EDUCATION

Master of Public Health **Portland, Maine** **December 2018**

University of Southern Maine, Muskie School of Public Service

- Relevant Coursework: Introduction to Epidemiological Research, Applied Biostatistical Analysis, Applied Public Health Research and Evaluation, American Health System, Health Politics and Policy, Health Law and Ethics, Health Systems Organization and Management, Quality Improvement, Health Literacy, Environmental Health, Social and Behavioral Health, Social Justice Theory and Policy Analysis, Leadership and Professional Development

Bachelor of Arts, Sociology **Portland, Maine** **May 2010**

University of Southern Maine, Department of Sociology

- Relevant Coursework: Medical Sociology, Sociology of Mental Health and Illness, Quantitative Research Methods, Qualitative Research Methods, Sociological Theory, Environmental Sociology, Sociology of the Body, Politics and Society, Politics of Race and Ethnicity, Economic Geography, U.S. Economic and Labor History, Social Movements, Understanding Contemporary Capitalism

Professional Training and Development:

SAS Training **November 2010**

Online SAS Institute

- SAS Programming 1: Essentials

Lean Six Sigma Training **March 2017**

GoLeanSixSigma.com

- Lean Six Sigma White Belt Certified

Institute for Healthcare Improvement **March 2017**

IHI Open School

- TA 102: Improving Health Equity
- QI 104: Interpreting Data: Run Charts, Control Charts, and Other Measurement Tools

Michigan Public Health Institute **March 2017**

Office of Accreditation and Quality Improvement

- Embracing Quality in Public Health: A Practitioner's Performance Management Primer

Graduate Field Experience **January 2018 – June 2018**

Minority Health Program, Portland, Maine

- Experience-based learning. Provided project support for community health needs assessment and program to increase colorectal cancer screening rates and improve colorectal health among vulnerable populations

USM Data Innovation Project Training **May 2018**

Track Your Impact: A Day-long Performance Measurement Workshop

SQL Training

July 2018

Adventures With SQL Lunch and Learn

- Workplace learning and development series

Collaborative Institutional Training Initiative

January 2021

CITI Program Training

- Health Information Privacy and Security for Researchers (completed Jan. 2021)
- Social and Behavioral Research (completed Sep. 2020)
- Responsible Conduct of Research (completed Sep. 2020)
- Financial Conflicts of Interest (completed Sept. 2020)

HONORS AND PROFESSIONAL MEMBERSHIPS

2010	Graduated <i>magna cum laude</i> , BA, University of Southern Maine
2007-2010	Member, University of Southern Maine Dean's List
2008-present	Member, Alpha Kappa Delta International Sociology Honor Society
2010-present	Member, Phi Kappa Phi Honor Society
2010-present	Member, National Rural Health Association
2010-present	Member, National Association of Rural Mental Health
2016-present	Member, Maine Public Health Association
2016-present	Grant Reviewer, Health Resources and Services Administration
2019	Outstanding Capstone, Master of Public Health Program, Muskie School of Public Service

TECHNICAL PROFICIENCY

- Microsoft Office Suite
- SAS 9.4
- EndNote
- Snap Survey Software

PROFESSIONAL EXPERIENCE

Research Associate I – Muskie School of Public Service, USM, Portland, ME *June 2019-present*

- Participates on research teams for the Maine Rural Health Research Center, the Medicare Rural Hospital Flexibility Program, the Annual Survey of Children Served by MaineCare, the Maine Behavioral Risk Factor Surveillance System, and other funded projects.
- Acts as project director on small to medium sized projects. Supervises and coordinates day-to-day project activity, manages budgets, monitors work plans, and revises as necessary to assure project activity is completed on time and within budget.
- Manages proposal development process, collaborates with principal investigators in designing research or program methodology, monitors timelines, develops budgets, oversees submissions from collaborators and contractors, and assures timely submission of proposals. Develops research questions, timelines and work plans, analytic/evaluation approach, and allocation of resources for qualitative and quantitative research projects.
- Prepares applications for and assures compliance with Human Subject Review process.
- Conducts and oversees collection and analysis of qualitative data.
- Conducts and oversees analysis of quantitative data. Works with PI to develop and manage analysis plan and conceptual design for data file construction and analysis. Works with PI to conceptualize, design and implement multivariate analyses with support.

- Analyzes and evaluates policy implications from findings. Maintains project data, prepares and submits project interim and final reports. Works with PI to ensure quality and integrity of project work.
- Writes policy briefs, working papers, journal articles, and other documents related to project activity. Develops and presents professional papers at state, regional and/or national meetings. Presents to professional and lay audiences on rural health topics.
- Provides research assistantship opportunities for, and assists, advanced undergraduate and graduate students in the Muskie School of Public Service.

Research Analyst II – Muskie School of Public Service, USM, Portland, ME

Apr 2017-June 2019

- Participate on research teams for the Maine Rural Health Research Center, Medicare Rural Hospital Flexibility Program, Annual Survey of Children Served by MaineCare, Maine Lung Cancer Coalition and other funded projects, providing operational support across multiple ongoing studies
- Data acquisition and collection – prepare quantitative and qualitative data collection protocols and tracking instruments; monitor systematic processes for quantitative data collection; design, develop, and test data collection and/or interview instruments; develop study recruitment materials; conduct qualitative interviews with primary and key informants including rural health professionals, hospital personnel, and other stakeholders; conduct literature searches and policy reviews
- Data management – construct, clean, and manage analytic data files; provide data documentation; archive project files
- Project development – assist in identifying project topics and new opportunities; draft sections of proposals and conduct background work (i.e., literature reviews) necessary for proposal development
- Project management and implementation – track project goals, activities, and findings and communicate them to internal and external vendors; assist senior staff in monitoring specifications of work with external vendors; aid the development and monitoring of project work plans; convene and coordinate project planning and work teams; prepare project progress reports and other communications with funding agencies; coordinate communications within the project team and with external collaborators; assure analytic project activity is completed within budget; prepare materials for institutional review board review; oversee work of Research Analyst Is, Research Assistants, and Graduate Assistants
- Product development – prepare written products including memoranda, policy briefs, technical reports, and journal articles; submit abstracts for consideration at state, regional, and national conferences; develop and deliver poster and podium presentations at professional conferences

Research Analyst I – Muskie School of Public Service, USM, Portland, ME

Aug 2015-Apr 2017

- Participate on research teams for the Maine Rural Health Research Center, Medicare Rural Hospital Flexibility Program, Annual Survey of Children Served by MaineCare and other funded projects, providing operational support across multiple ongoing studies
- Conduct literature and policy reviews, including literature searches and integrated review of prior studies and relevant policy; write sections or drafts of research products including policy briefs, working papers, memos, and journal articles; contribute to proposals for research funding
- Organize, summarize and abstract data for benefit of project team; assist in construction of analytic data files; assist in the descriptive analysis of quantitative data; summarize outcomes of inferential analyses for benefit of project team; assist in qualitative data analysis and identification of data themes
- Assist in design and development of data collection instruments and research protocols; monitor systematic processes for data collection and cleaning; conduct qualitative interviews with primary and key informants including rural health professionals and hospital personnel
- Contribute to project management by aiding in the development and monitoring of project work plans; assist senior staff in monitoring specifications of work with external vendors; write summaries of project activities; communicate project goals, activities, and findings to internal and external vendors; prepare materials for institutional review board review

- Disseminate research findings by drafting abstracts for consideration at state, regional and national conferences; develop and deliver poster presentations and podium presentations
- Supervise graduate assistants for the Maine Rural Health Research Center and Flex Monitoring Team

Research Assistant II – Muskie School of Public Service, USM, Portland, ME **Oct 2010-Aug 2015**

- Participate on research teams for the Maine Rural Health Research Center, Medicare Rural Hospital Flexibility Program, and Annual Survey of Children Served by MaineCare, providing operational support across multiple ongoing studies
- Conduct literature reviews, review and summarize key provisions of state and federal legislation, conduct telephone interviews, collect and manage project data, perform quantitative analyses using SAS 9.4, assemble data tables
- Prepare reports on rural health system topics including rural hospital patient safety, quality improvement, and community benefit activity; health insurance coverage and access to care in rural areas; rural long term services and supports; the experience of care and health status of children enrolled in MaineCare; rural health clinic practice transformation; and implementation of the Affordable Care Act in rural areas
- Draft concept papers for proposed studies and develop project timelines and work plans
- Present study findings at relevant professional conferences

Research Analyst I – RTI International, Waltham, MA **May 2010-Oct 2010**

- Experience in a team-oriented health policy research environment
- Assist senior members of policy team by performing Excel spreadsheet management in preparation for SAS statistical analyses, assembled data tables, performed preliminary interpretations of SAS output, summarized findings, and conducted literature reviews
- Organize confidential patient files and healthcare provider data collected for a federally funded, national research project sponsored by the Centers for Medicare & Medicaid Services (CMS).
- Instruct hospital staff in data collection methods and procedures, and recorded notes during meetings at healthcare facilities participating in the study
- Examine consistency of payment incentives, resource usage, and outcomes for populations treated in acute and various post-acute care settings. For more information visit www.pacdemo.rti.org

RESEARCH SUPPORT

Maine Rural Health Research Center. This grant is funded by the Federal Office of Rural Health Policy and supports a portfolio of projects addressing rural health insurance, long term services and supports, primary care, behavioral health, and children's health. The Center informs policymaking and the delivery of rural health services through research, policy analysis, and technical assistance on issues of regional and national significance.

Rural Hospital Flexibility Monitoring Team. Funded by the Federal Office of Rural Health Policy, this project assesses the impact of the Medicare Rural Hospital Flexibility Program on Critical Access Hospitals and their communities, and examines the role of states in achieving overall program objectives.

Behavioral Risk Factor Surveillance System. Funded by the Maine Department of Health and Human Services (DHHS), the BRFSS survey collects data on health-related risk behaviors and events, chronic health conditions, and the use of inventive health practices among Maine's adult population. This project comprises data cleaning and standardization, performance of ad hoc analyses, and provision of technical and statistical assistance to DHHS. Data analysis from BRFSS surveys informs policy development, program planning, and other public health interventions.

Survey of Children Served by MaineCare. Funded by the Maine Department of Health and Human Services, this annual survey of parents of children enrolled in MaineCare, Maine's Medicaid and Children's Health Insurance Program, measures experience of care, diet and exercise, and parent-reported body mass index.

Sustainable Public-Private Strategies to Improve Population Health in Maine. Funded by MaineHealth, this project sought to explore the unique role of hospitals and health systems in addressing population health challenges, and to identify financing strategies that health systems use to fund successful population health initiatives. Intensive literature review and key informant interviews with state and health system leaders were used to generate a report to MaineHealth leadership offering recommendations about replicable and sustainable strategies to fund population health initiatives.

Maine Lung Cancer Coalition and Maine Lung Health Study. Funded by the Bristol-Myers Squibb Foundation, Maine Cancer Foundation, and the Maine Economic Improvement Fund, this project seeks to develop the infrastructure required to implement and disseminate evidence-based lung cancer prevention and early detection services, and facilitate early referrals for treatment of lung cancer patients. A central focus of the initiative is to

expand access to lung cancer prevention, early detection, and treatment services for vulnerable, rural, underserved patient populations in Maine.

Assessing Challenges and Opportunities of Implementing Health Reform in Rural America. Funded by SHARE, a program of the Robert Wood Johnson Foundation, this project analyzed rural issues, challenges, and policy strategies to achieve more effective rural implementation of the Affordable Care Act.

Advancing Rural Health Transformation: Profiling Rural Maine. Funded by the Maine Health Access Foundation, a nonprofit working to promote access to quality health care and improve the health of Maine residents, this project generated state and county-level profiles describing the health resource availability and socioeconomic and health status characteristics of Maine counties. The final reports were used to foster community discussions and engagement among local stakeholders to advance new approaches to rural health care delivery.

Oxford County Wellness Collaborative Program Evaluation and Support. This project comprised evaluation and data support services for several Maine Health Access Foundation-funded initiatives undertaken by OCWC to improve population health in Oxford County, Maine. The initiatives sought to reduce childhood obesity by encouraging healthy eating and physical activity, promote resilience to adverse childhood experiences, improve substance use prevention and treatment services, and use community gardens as a platform to foster greater community engagement.

MaineCare Expansion Capacity Analyses and Outreach Evaluation. Funded under a cooperative agreement with the Office of MaineCare Services, the goal of this study is to complete a capacity analyses and evaluation of outreach activities of the MaineCare Medicaid expansion program as part of a broader initiative funded by the Robert Wood Johnson Foundation. This work will assist the Maine Department of Health and Human Services by identifying potential service gaps in meeting the needs of the newly enrolled MaineCare expansion population, highlighting strategies for addressing identified gaps, and evaluating the effectiveness of expanded outreach and enrollment strategies to inform program planning in future years.
